

View of GWR model selection with different variables

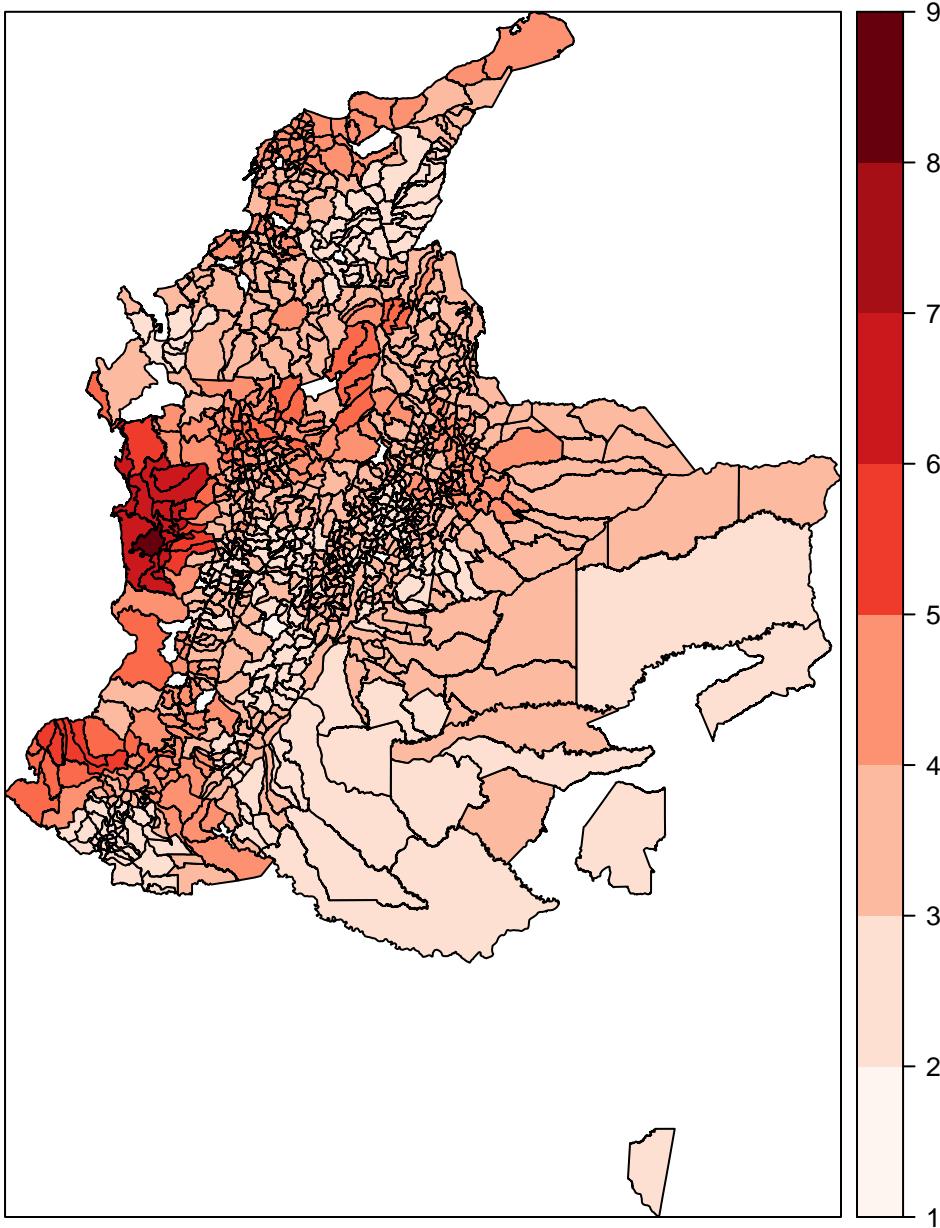

Alternative view of GWR model selection procedure

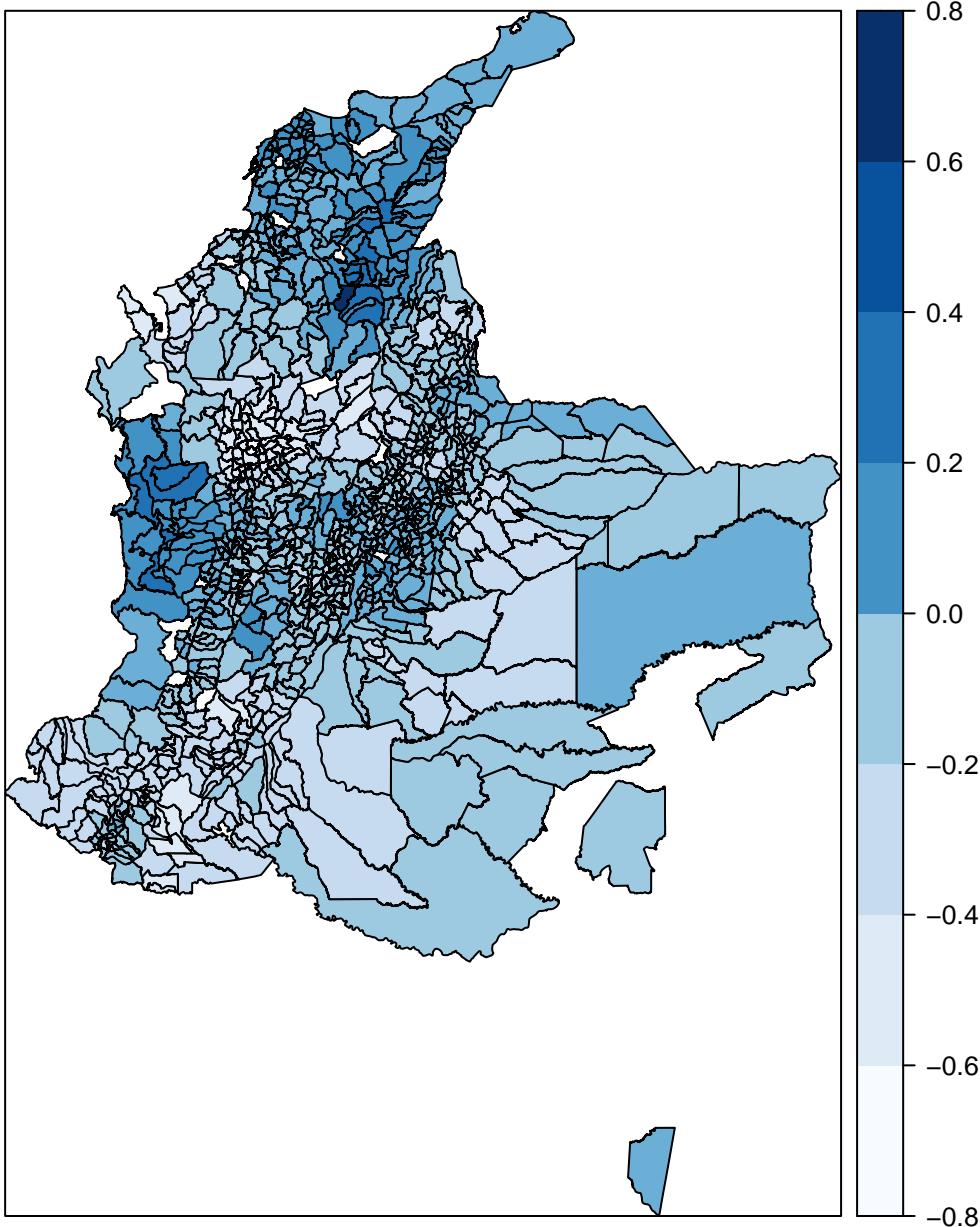

GW standard deviations for dependent variable (basic)

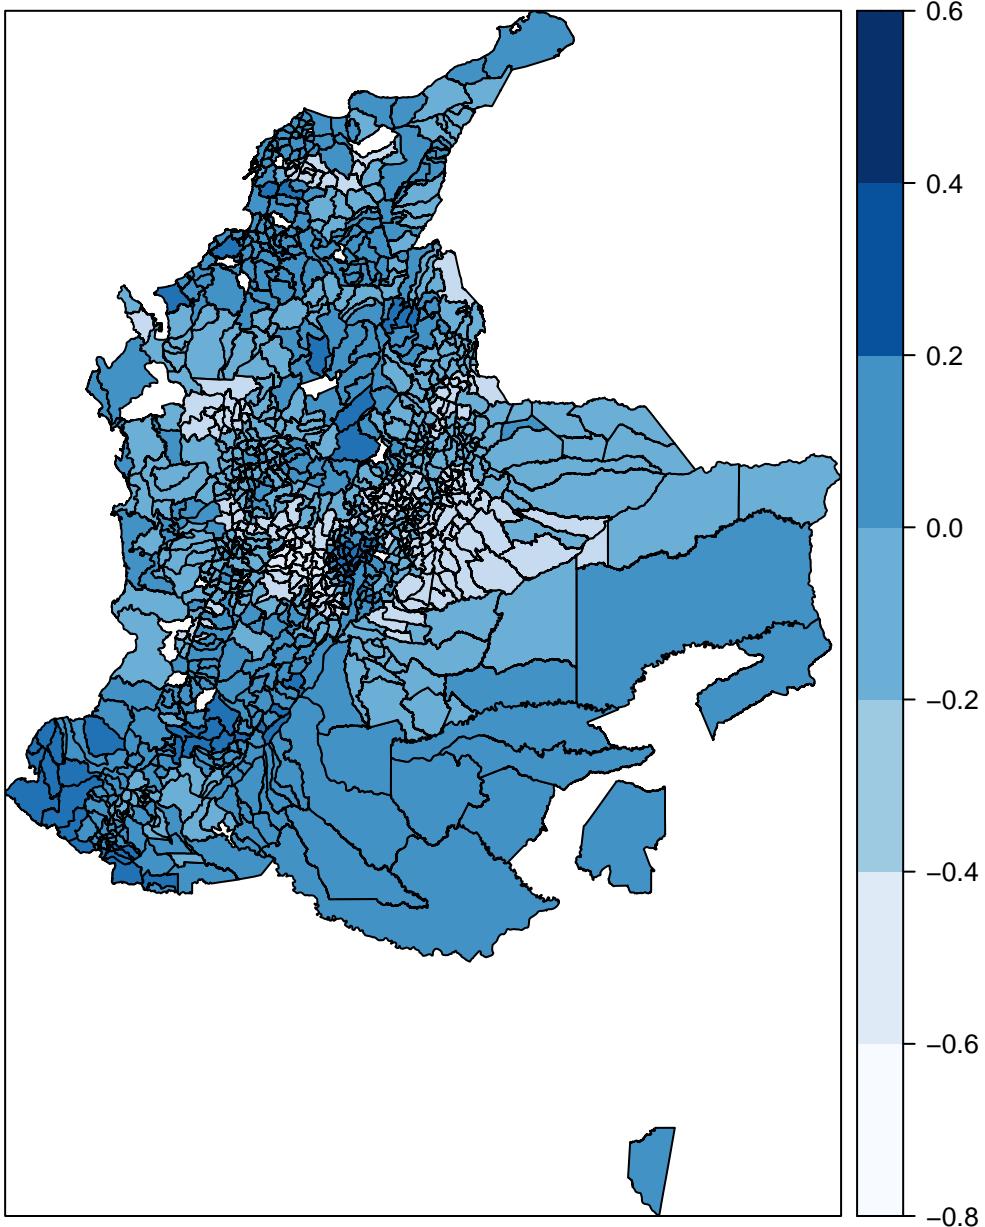

GW inter-quartile ranges for dependent variable (robust)

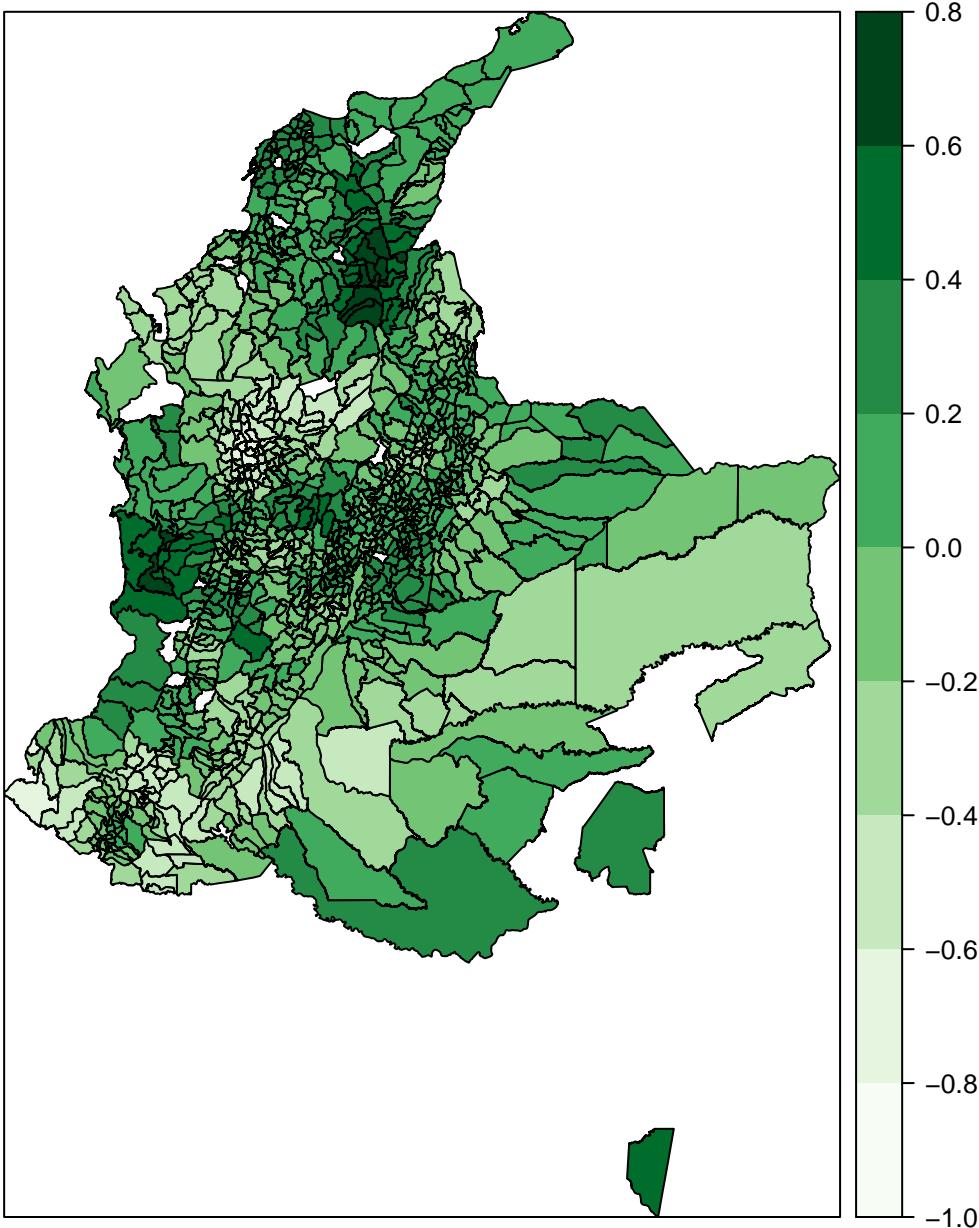

GW correlations: Dependent and first independent variable (box–car kernel)

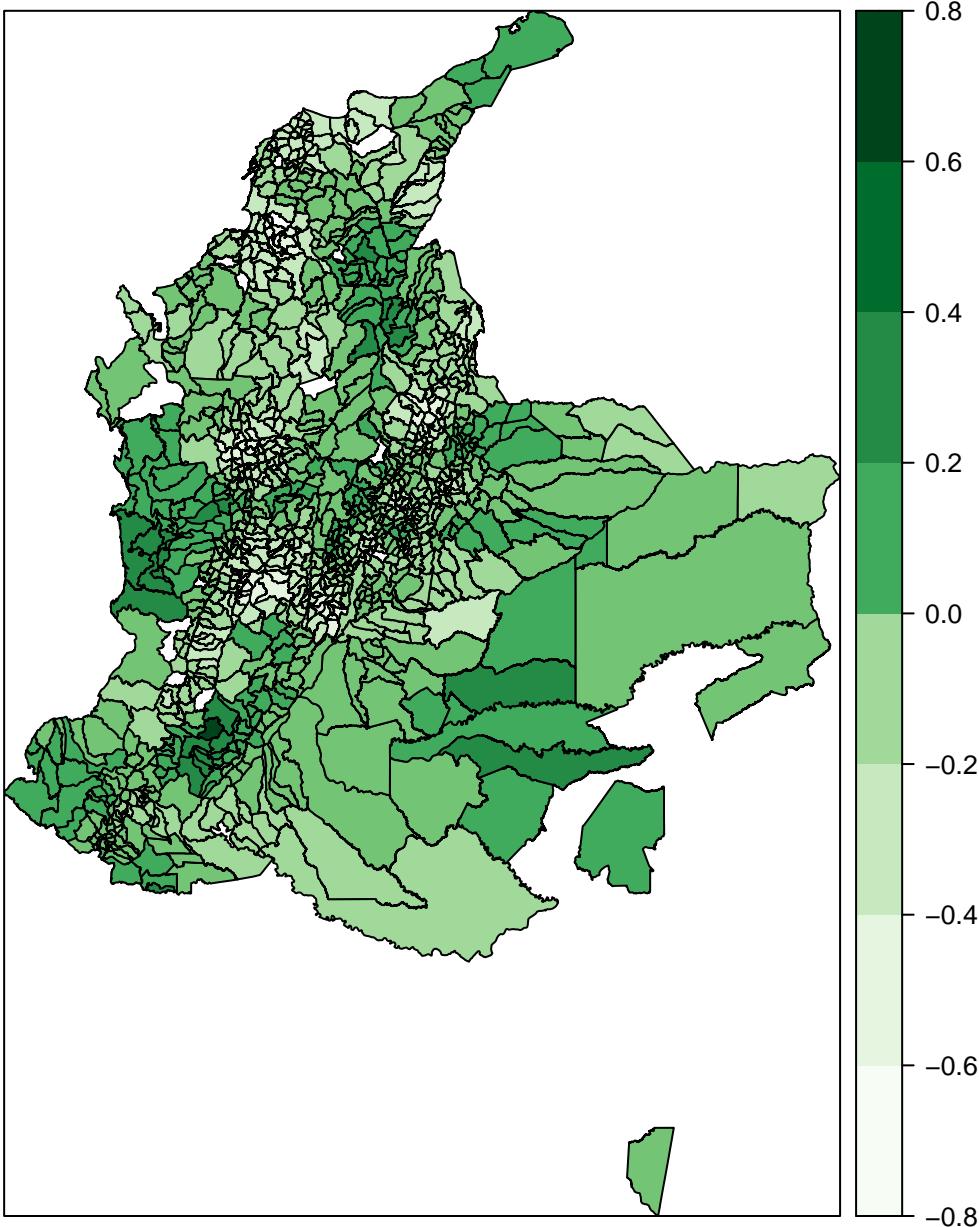

W correlations: Dependent and second independent variable (box–car kernel)

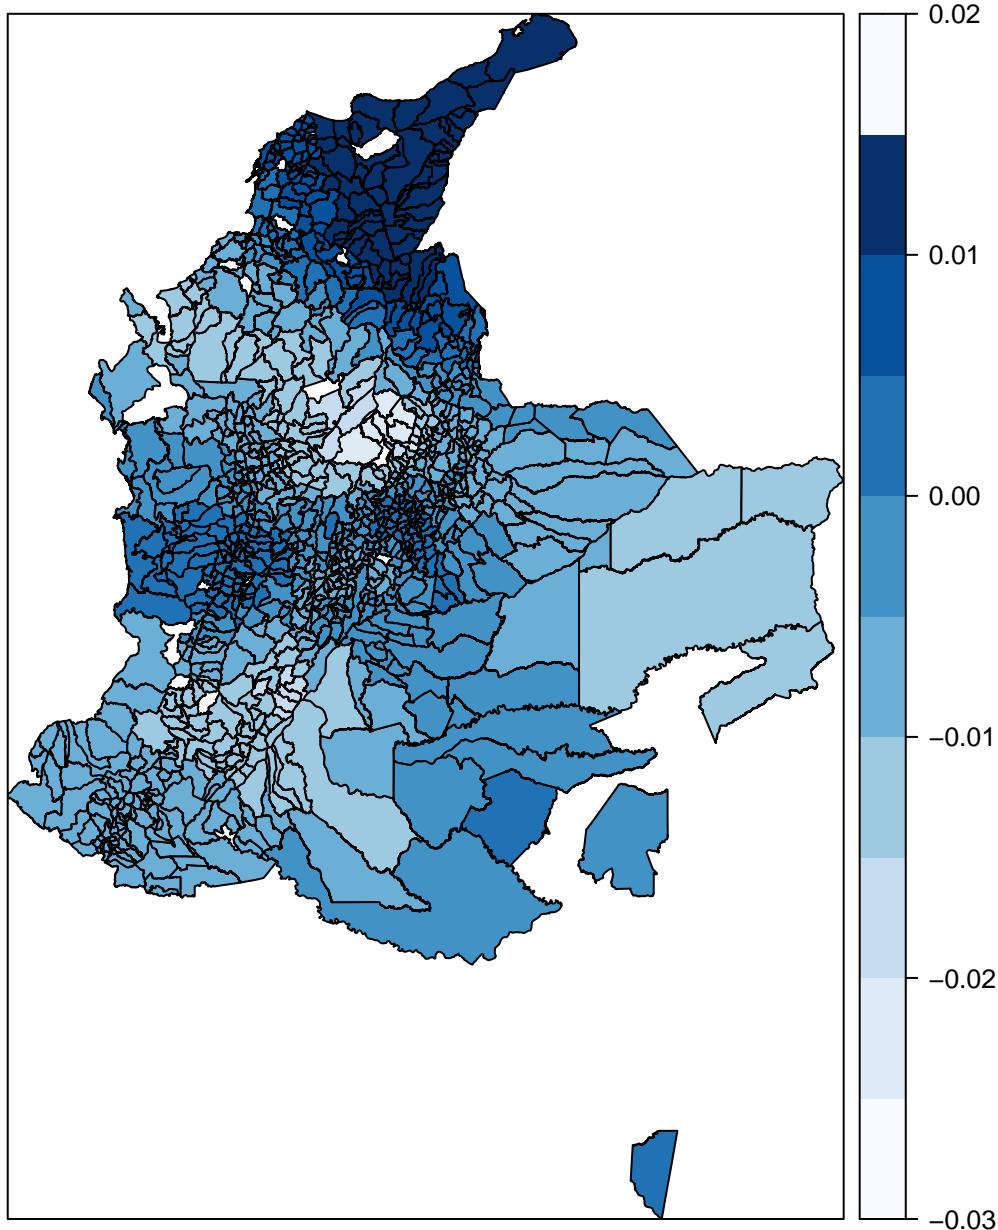

GW correlations: Dependent and first independent variable (robust)

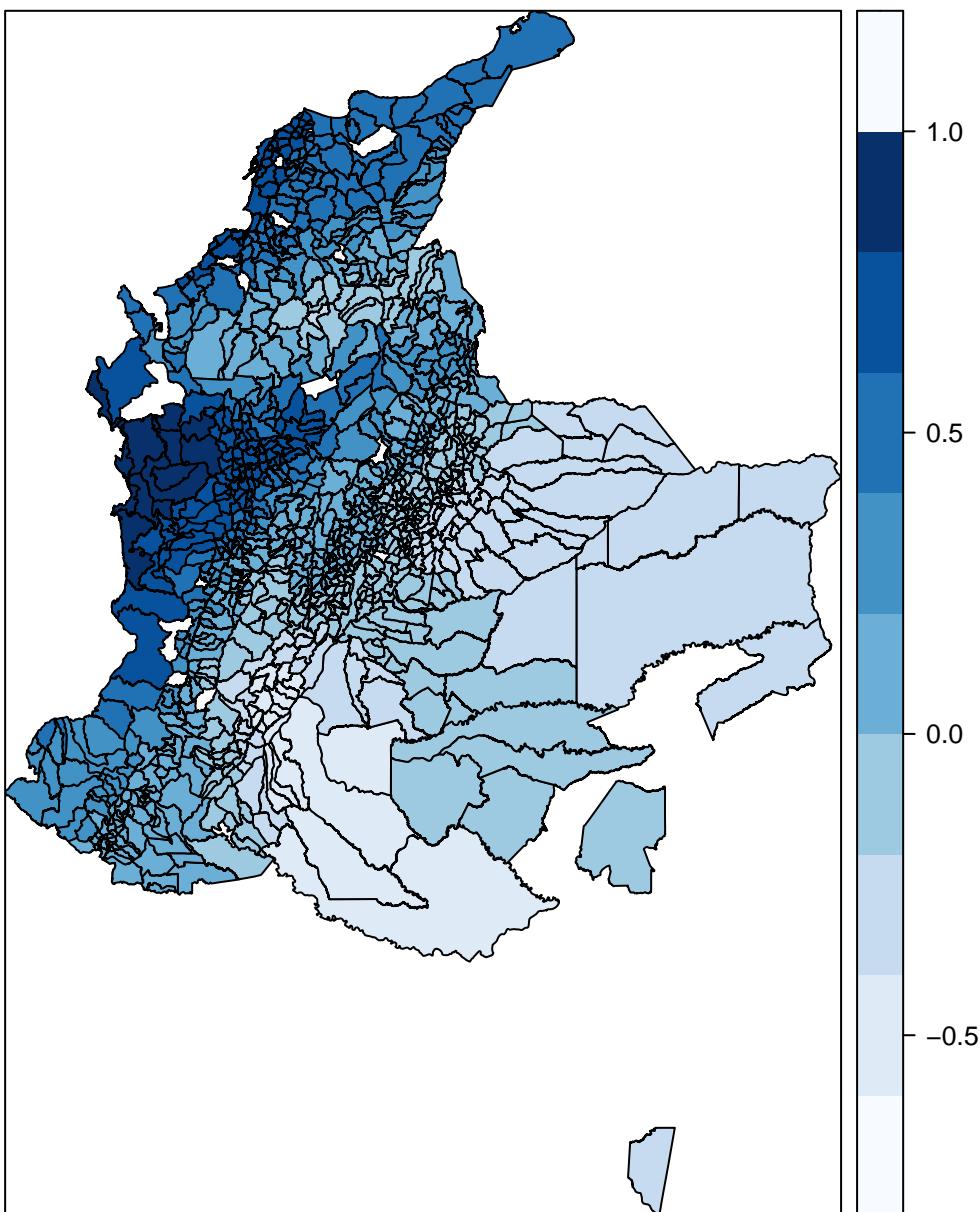

GW correlations: Dependent and third independent variable (robust)

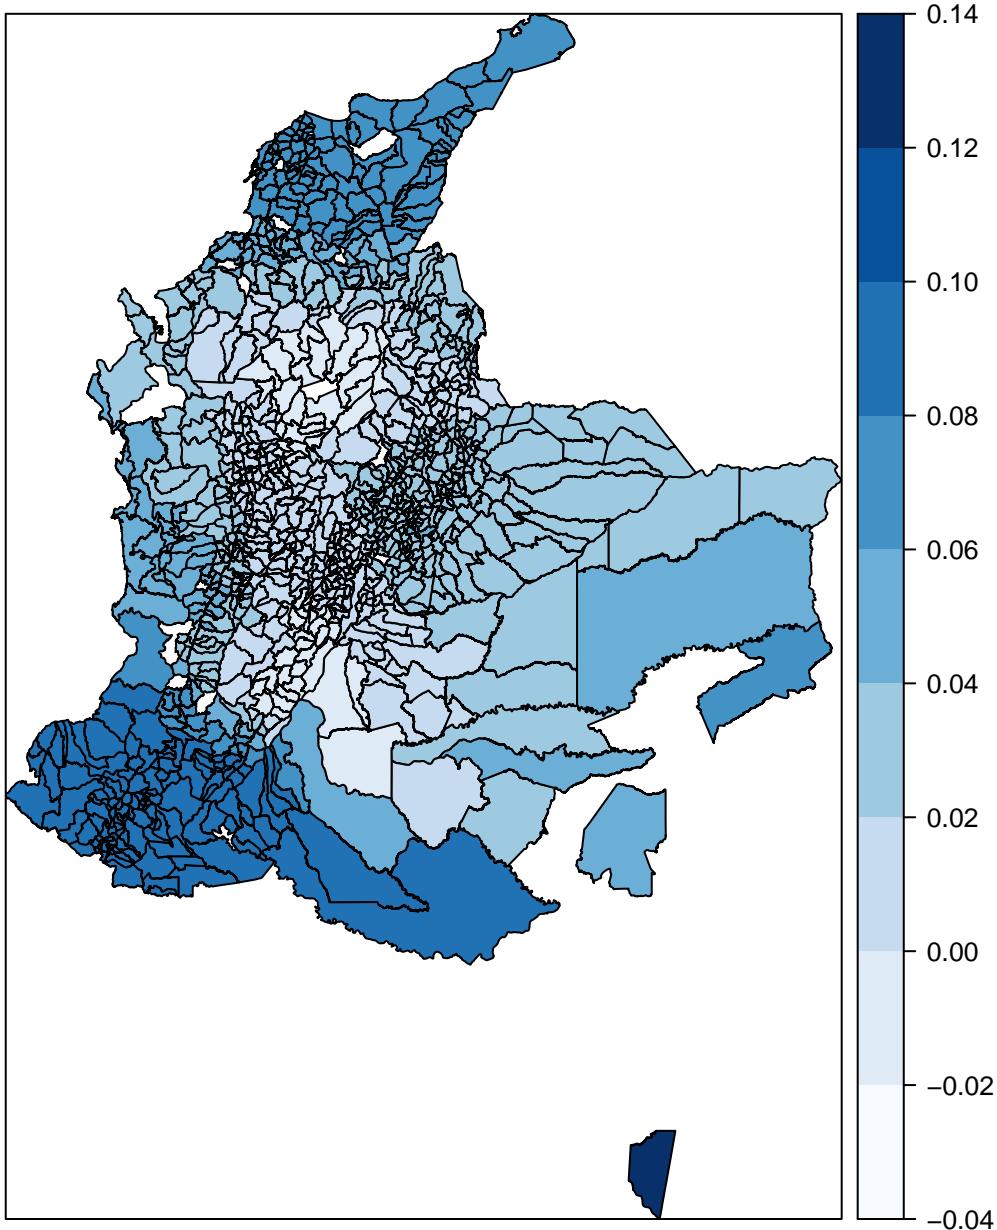

Basic GW regression coefficient estimates for the first independent variable

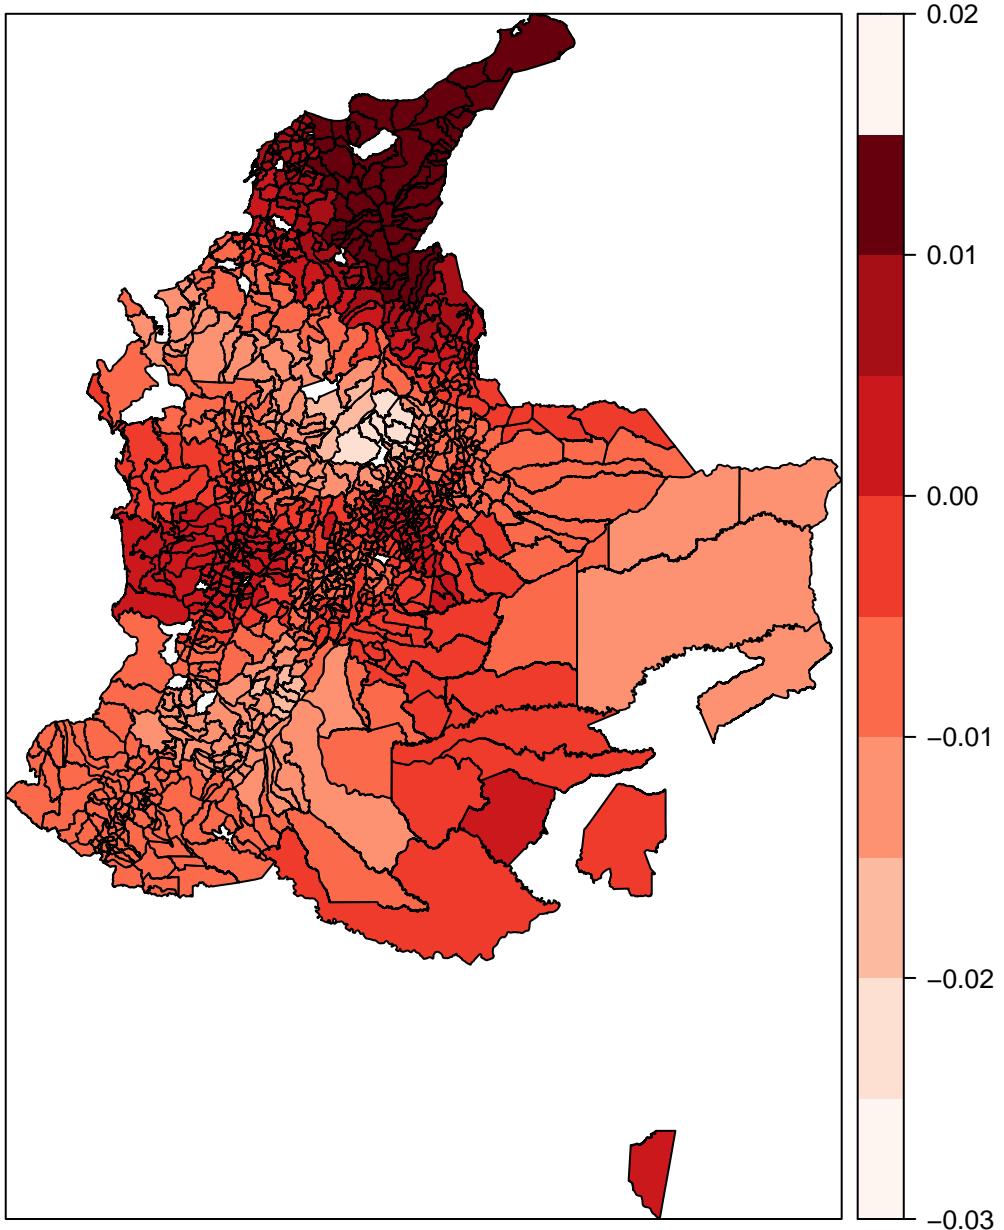

basic GW regression coefficient estimates for the second independent variable

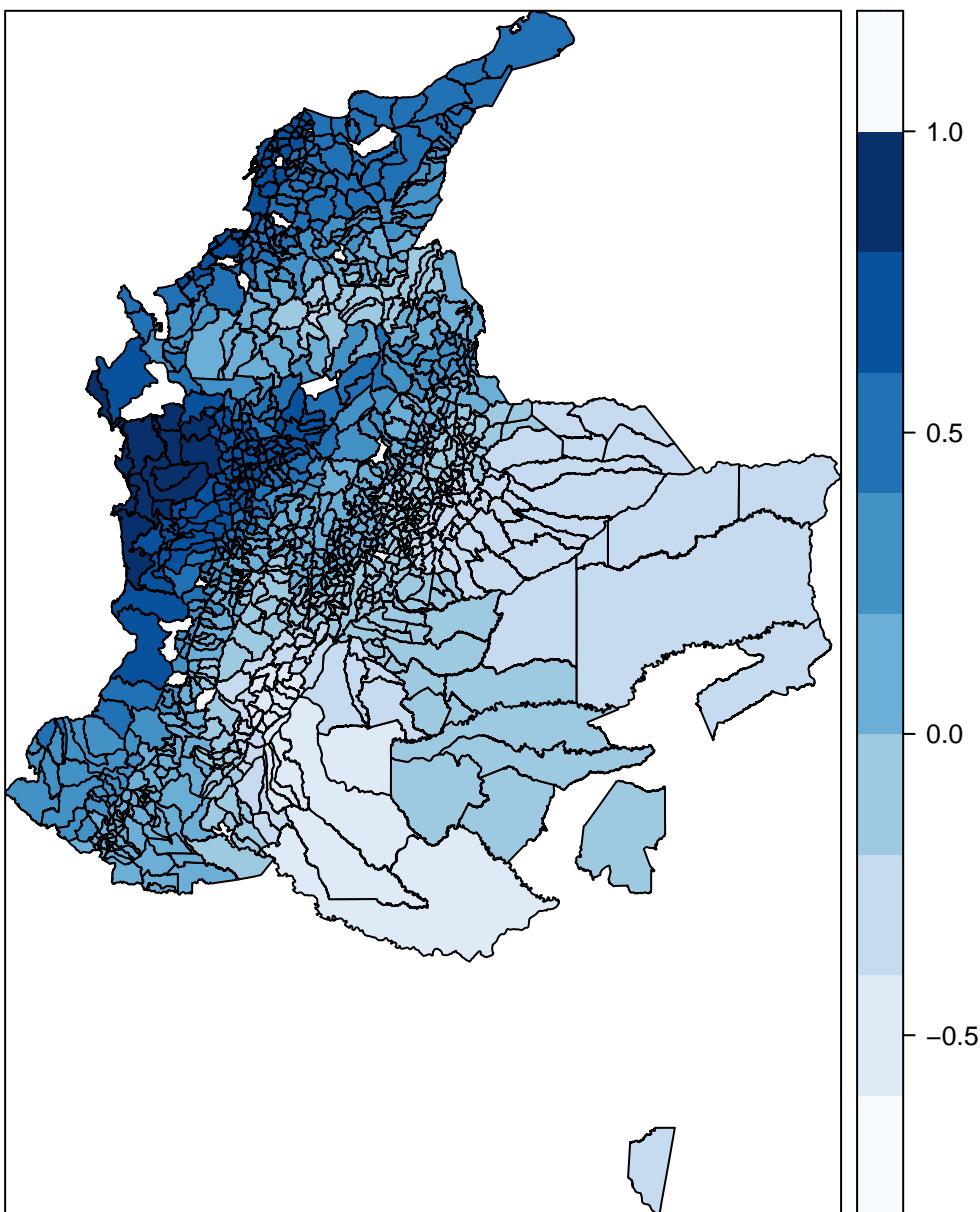

Basic GW regression coefficient estimates for the third independent variable

Robust GW regression coefficient estimates for the first independent variable

robust GW regression coefficient estimates for the second independent variak

Robust GW regression coefficient estimates for the third independent variable
